Unigen Names Regan Miles as President and CEO

Seattle, WA – April 6, 2015: Unigen, Inc. announced today that Regan Miles has been selected to lead the company as President and CEO.

Miles has a long history of success in the health and wellness industry and brings over 30 years of experience to Unigen. Miles most recently served as President of Next Pharmaceuticals, Inc. where he led the firm in launching multiple new products and growing sales exponentially. He has demonstrated his expertise in the industry, during his time with companies such as Nature’s Way, Pharmanex and Alpine Health.

This is Miles second time leading Unigen, Inc. as President and CEO. He previously served from 2002 until 2007 and during that time he was instrumental in growing the business from a new research and development firm to a profitable patented ingredient supplier. During his initial time at Unigen, the firm launched 10 proprietary branded ingredients that ultimately brought the vision and mission of the company, “Bringing the best of nature to humankind” to fruition.

Unigen’s owner and founder, Mr. Bill Lee said, “We are thrilled to have Regan back at the helm of Unigen and know that his leadership will take the company to new heights.”

About Unigen

Unigen discovers, develops and manufactures proprietary natural-product active ingredients for dietary supplements, functional foods, cosmetic and personal care products, prescription medical food and botanical drug products. The Company discovers its proprietary ingredients through our high throughput screening PhytoLogix™ approach applied to a proprietary well-annotated collection of botanicals and a legacy mining approach applied to botanicals having known medicinal benefits. Mechanism of action, safety and efficacy are documented with extensive preclinical *in vitro* and *in vivo* testing and by human clinical studies. Unigen protects its discoveries with issued patents and patent filings in all major territories, and manufactures its products to GMP standards. Unigen commercializes its proprietary ingredients through licensing and ingredient supply alliances with commercial partners engaged in the

manufacture, distribution and marketing of end-products in each of Unigen's target markets.
